SUMMARY

As a Full Stack Web Developer with expertise in the MERN stack, I focus on creating high-performance web applications that prioritize user experience and scalability. I'm passionate about collaborating with teams to solve complex problems and continuously improving my skills to deliver innovative and efficient solutions. I am driven by a commitment to excellence, constantly exploring new technologies to stay ahead of industry trends and enhance the development process.

SKILLS

- ❖ **Technologies :** MongoDB, Express.js, React.js, Node.js (MERN Stack)
- ❖ **Frontend :** HTML, CSS, JavaScript, React.js, Bootstrap
- ❖ **Backend :** Node.js, Express.js, MongoDB, SQL
- ❖ **Authentication & Version Control :** JWT, Bcrypt, Git, GitHub
- ❖ **Tools :** GitHub, Visual Studio Code
- ❖ **Others :** OOP, DBMS, Cyber Security

EDUCATION

- ❖ Bachelor's in Information Technology | Savitribai Phule Pune University
  Year of Study : Third Year (Pursuing) | **Current SGPA :** 7.66
- ❖ Higher Secondary Certificate (HSC) | Shri Dnyaneshwar Mahavidyalaya, Newasa
  Percentage : 73.5% | **Year :** 2022

PROJECTS

- ❖ **Full Stack Food Delivery Application**

  - Developed an end-to-end food delivery application that allows users to browse menus, filter items, place orders, and track deliveries, featuring secure payment integration and an admin panel for efficient management.
  - Highlights **:** Developed custom APIs, integrated JWT for secure authentication, and implemented Stripe for payments.
  - Technologies **:** MongoDB, Express, React, Node.js (MERN stack), JWT, bcrypt, Stripe, CSS.
  - Link **:** *https://foodflow-ui.onrender.com*

- ❖ **TravelExplorer Web Application**

  - Developed a dynamic travel listings platform where users can explore destinations, write reviews, and manage accounts with user authentication.Implemented backend operations for handling user data and travel information, with the ability to interact via API calls.
  - Highlights: Integrated secure user authentication and developed backend APIs for managing travel data, enabling users to interact with the platform through seamless form submissions and account access.
  - Technologies **:** HTML, CSS, JavaScript, Node.js, Express, MongoDB, EJS, MVC Frameworks.
  - Link **:** *https://wnderlust-project.onrender.com/listings*

- ❖ **Zerodha Clone**

  - Designed and developed a responsive front-end clone of the Zerodha trading platform using React and Bootstrap for styling.
  - Highlights: Implemented dynamic components for user-friendly navigation, ensured responsive design for various screen sizes, and optimized performance for seamless user experience.
  - Technologies **:** React, Bootstrap, JavaScript
